EDUCATION

Easwari Engineering College <i>B.E Computer Science & Engineering</i>	8.27 CGPA 2024 – 2028
Alpha School CBSE <i>12th Grade</i>	91% 2023 – 2024

PROJECTS

Artisan Buddy | *React, FastAPI, ChromaDB, Qwen3*

- Engineered a FastAPI backend exposing REST APIs for conversational AI and pricing workflows.
- Integrated Groq-hosted Qwen multimodal models for structured information extraction and vision-based analysis.
- Built a ChromaDB-based RAG pipeline using semantic embeddings to retrieve similar products for contextual pricing.
- Developed a React frontend that abstracts pricing workflows into an easy-to-use conversational experience for artisans.

Team Work Log | *React, Node.js, Express.js, MongoDB, Resend, Vercel, Render*

- Developed a MERN-based employee productivity platform, currently supporting 40+ active users.
- Implemented JWT authentication with email verification, password reset, and OTP recovery using Resend's email API.
- Built RESTful APIs with advanced filtering by date, status, employee, and submission history.
- Designed role-based dashboards for activity tracking and deployed the application on Vercel and Render.

Aadhaar Data Quality Analysis | *Python, Pandas, Hugging Face Datasets, Matplotlib*

- Developed Python data pipelines using Pandas to clean and analyze public UIDAI datasets.
- Validated pincode records against official reference data, identifying inconsistencies and missing values.
- Generated state-wise visualizations and statistical insights using Matplotlib to evaluate data quality.
- Collaborated on data cleaning, exploratory analysis, and visualization using Git and Hugging Face Datasets.

EXPERIENCE

Software Development Intern <i>Yuukke Global Ventures Pvt. Ltd.</i>	June 2026 – July 2026 <i>Chennai, India</i>
- Developed AI-powered solutions for the company's platform using React, FastAPI, and LLM technologies. - Collaborated with the CTO to design, implement, and test features for internal and customer-facing applications. - Researched, prototyped, and developed AI workflows supporting pricing, image analysis, and digital commerce initiatives.	

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, C++, SQL, HTML5, CSS3
Frontend: React, Vite, Tailwind CSS, HTML5 Canvas, Responsive Web Design
Backend: Node.js, Express.js, FastAPI, REST APIs
Databases: MongoDB, MongoDB Atlas, MySQL, ChromaDB
AI & Data: RAG, Qwen, Groq API, Hugging Face Datasets, Pandas, Matplotlib
Tools & Platforms: Git, GitHub, VS Code, Vercel, Render, Figma

CERTIFICATIONS

Introduction to MongoDB (Students)-MongoDB	2025
CS50x: Introduction to Computer Science – Harvard University	2024
